Cardboard

Each of our cardboard coffins are high-quality in design and constructed using sustainable materials. They are made using at least 98% cardboard and paper, of which 70% has been recycled. What's more, we only use corn starch glue and environmentally-friendly inks in their manufacture. Being made in this way means that our cardboard coffins use 40% less material to manufacture than traditional coffins. This makes them substantially lighter which, in turn, reduces the environmental impact of transportation as well.

Alternatives

Our cardboard coffins are available in three different colours, all featuring traditional shaped body and lid, with rope handles they can be made available in white, brown or green.

Woollen
